

GENERAL INFORMATION	
Name:	Matheus Wachtler
Date of birth:	02/March/1996
Place of residence:	São Paulo - Brazil
Languages:	Portuguese (Native), English (Advanced)
Nationality:	Brazilian
Experience since:	2019
EDUCATION	
2017 - 2020	Bachelor degree in Systems Development - USCS - Universidade Municipal São Caetano do Sul
CERTIFICATIONS	
2025	GitHub Certified: GitHub Foundations
2024	Microsoft Certified: Azure Data Fundamentals - DP-900
2024	Microsoft Certified: Azure AI Fundamentals - AI-900
2024	Microsoft Certified: Azure Fundamentals - AZ-900
COURSES / TRAININGS	
2023	Automating your API tests with REST Assured - TAU - Bas Dijkstra
2023	Continuous Integration with Jenkins - TAU - Aparna Gopalakrishnan
2023	Testing Rest API with REST-Assured - Udemy - Francisco Wagner Costa Aquino
2023	BDD with Cucumber in JAVA - Udemy - Francisco Wagner Costa Aquino
2023	BDD and Java: Behavior Driven Development with Cucumber - Alura - Guilherme Silveira
2023	Automated Web Testing with Selenium and WebDriver 4 Using Java - Pluralsight - Bryan Hansen
2022	Test Automation with Robot Framework - Udemy - Mayara Fernandes
2022	Git and GitHub: repository, commits and versions - Alura - Guilherme Silveira
2022	Jenkins: continuous integration - Alura - Guilherme Silveira
2022	SQL with MySQL: Data Manipulation and Query - Alura - Guilherme Silveira
2022	Automated tests with Selenium WebDriver - Alura - Guilherme Silveira
2022	Java Polymorphism: Inheritance and Interface - Alura - Guilherme Silveira
2022	TDD and Java: Automated tests with JUnit - Alura - Guilherme Silveira
2022	Java Object Orientation - Alura - Guilherme Silveira
2022	Maven: Dependency management and building Java applications - Alura - Guilherme Silveira
2022	Linux - Concepts and Main Commands - Udemy - Ricardo Prudencianto
2022	Postman - API Test Automation - Udemy - Erick Valentin
2021	Scrum Guide - Udemy - Ismael Ramirez
PROJECTS	
Sr QA Engineer	Avanade
Sep/2024 - Present	Avanade is a leading consulting and solutions company, specializing in cloud computing, Artificial Intelligence (AI), and industry-specific solutions. Our primary focus is on optimizing the Microsoft ecosystem, empowering businesses to enhance their operations through technology.
Tasks	I work with mobile test automation for major clients in the financial sector, ensuring the quality and reliability of delivered solutions. I collaborate with cross-functional teams to enhance testing processes and improve the user experience.
Activities	Test automation Mobile test automation BDD Working in agile environments Relational databases Continuous Integration and Continuous Delivery (CI/CD) Supporting new professionals with technical questions
Results / Achievements	Deliver high-quality work following best development practices, ensuring value for the client. Quickly adapt to new automation tools, mastering them in a short time despite having no prior experience. Consistently meet deadlines, ensuring timely delivery of results without compromising quality.
Technologies	Java JUnit TestNG Appium Inspector Selenium WebDriver Cucumber MySQL Bitbucket
Mid Level QA Analyst	Serasa Experian
Sep/2022 - Sep/2024	Serasa Experian is one of Brazil's leading information services companies, specializing in credit analysis, risk management, and decision-making solutions. As part of the Experian group, it helps businesses and consumers access credit securely, providing data and insights to drive business growth and financial well-being.
Tasks	During my time at Experian, I worked on executing automated and manual tests for one of the largest telecommunications clients in Brazil. My experience included API testing, performing manual tests on mobile applications, and creating detailed documentation to ensure test quality and traceability.
Activities	Manual and automated testing> API testing (manual and automated) Regression, smoke, and exploratory testing Mobile testing (manual) Development of detailed documentation Working in waterfall and semi-agile environments
Results / Achievements	I was the first QA hired at Experian for this team, taking on the responsibility of establishing the testing processes from scratch. I developed and standardized test documentation, ensuring greater efficiency and traceability. These initiatives significantly improved the quality of the delivered software, enhancing application reliability and optimizing the development workflow.
Technologies	Rest-Assured Java Maven Postman Jira
Jr Support Analyst	Serasa Experian
May/2021 - Sep/2022	Serasa Experian is one of Brazil's leading information services companies, specializing in credit analysis, risk management, and decision-making solutions. As part of the Experian group, it helps businesses and consumers access credit securely, providing data and insights to drive business growth and financial well-being.
Tasks	Working as a Junior Support Analyst, my main role is to identify, log, address, and, if necessary, escalate to the responsible teams in cases of slow performance, intermittency, or unavailability of the solutions offered by the company.
Activities	Identifying, logging, and addressing incidents of slow performance, intermittency, and unavailability Collaborating with responsible teams for problem resolution and maintaining availability Manual testing Automated testing
Results / Achievements	As a Jr Support Analyst, I identified repetitive tasks that could be automated and, on my own initiative, studied Postman to develop pilot scripts for API testing. This initiative improved test accuracy, optimized the team's time, and allowed for greater focus on more complex tasks, thereby enhancing operational efficiency.
Technologies	Postman Service Now Jira Grafana
Support Analyst	Tecnocomp
Aug/2019 - Jan/2021	Tecnocomp is a Brazilian company specializing in information and communication technology (ICT) solutions. With over three decades of experience, the company stands out for offering advanced services in areas such as Service Desk, support and asset management, data center services, and IT infrastructure.
Tasks	As an Support Analyst at Tecnocomp, I provided remote support to major hospitals in Brazil, assisting clients via chat, voice, or email. My main responsibility was to resolve technology issues related to network, printers, and system errors, ensuring the continuity of operations in the healthcare sector.
Activities	Resolving and forwarding client-created tickets Integrating systems with new clients Analyzing and providing support via email and VoIP Learning and applying the ITIL methodology
Results / Achievements	I worked in the support area for major clients in the healthcare sector during the pandemic. During this period, my role was to ensure the continuity of systems and equipment in a high-demand environment, quickly resolving technological issues to minimize impacts on hospital operations. In this company, I had the opportunity to participate in the implementation of the company's solutions for a newly acquired client. I worked closely with the team to structure and document processes from scratch, ensuring a smooth and successful transition. This experience was essential in deepening my knowledge in the support area.
